

FORLESS Makes Professional Websites Easy and Affordable for Small Businesses

August, 2026

Millions of small businesses still pay hundreds of dollars every year for a basic website—or never build one at all because it is too expensive or too complicated. **FORLESS** is changing that by making professional websites accessible to everyone.

Users simply describe their business with just a few words, such as "coffee shop" or "hair salon," and **FORLESS** automatically creates a complete, mobile-friendly website in about 60 seconds. No coding, design skills, or technical experience are required.

Built specifically for small businesses, entrepreneurs, freelancers, startups, restaurants, salons, clinics, consultants, and local service providers, FORLESS removes the cost and complexity that have traditionally prevented many businesses from building a professional online presence.

Every website can be customised using an intuitive visual editor. Users can easily update text, images, colours, services, products, contact information, and branding. Websites can be published instantly with a free FORLESS subdomain or connected to a custom domain with free hosting and SSL security included.

FORLESS also includes essential business tools such as SEO-ready pages, Google Analytics integration, Meta Pixel support, contact forms, and one-click WhatsApp, phone, and email buttons.

Unlike traditional website builders that charge expensive monthly subscriptions, FORLESS offers professional websites starting at just ****\$5.99 per year**** less than the price of a cup of coffee in many countries. The company believes every small business deserves an affordable, professional online presence regardless of budget or technical experience.

"Building a professional website shouldn't be expensive or complicated. Our goal is to help every small business get online quickly with a website they can be proud of."

FORLESS is available worldwide.
